INSTALLATION

Please read the followings before installing and usage.

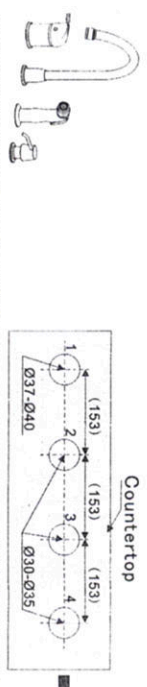

■ For Reference only (unit = mm)

Notes: If the faucet you bought has no sprayer, drill the hole 1 will be ok.

Notes: If the faucet you bought has no sprayer, drill holes 1 & 3 will be ok.

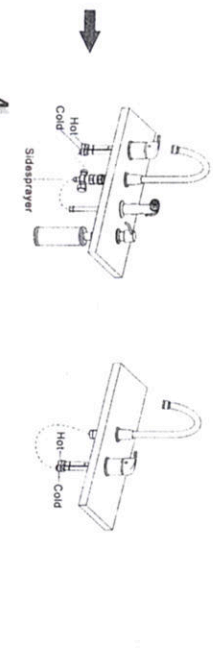

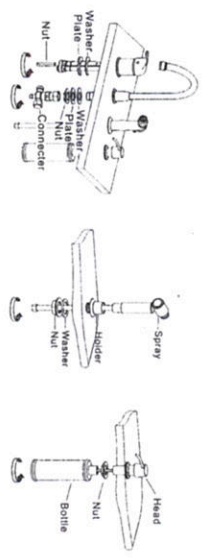

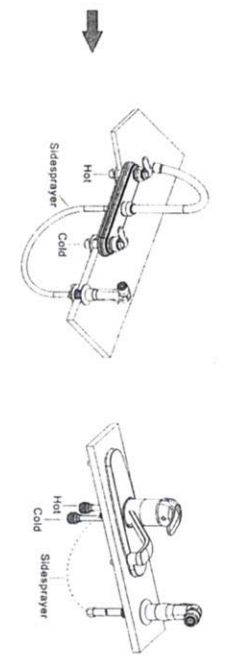

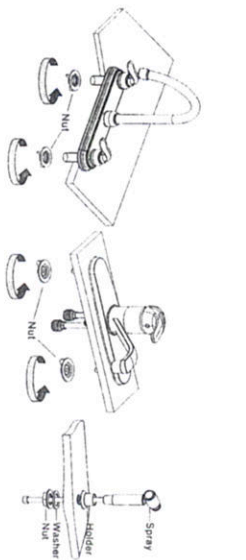

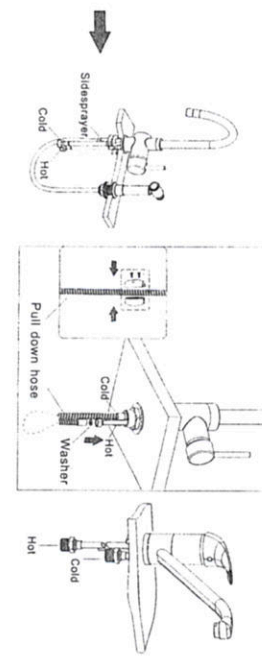

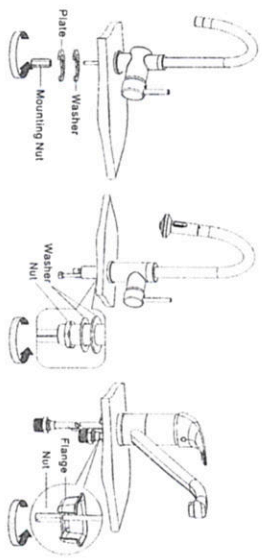

Notes: If the faucet you bought has no soap dispenser, drill holes 1, 2 & 3 will be ok. If the faucet you bought has no soap dispenser or sprayer, drill holes 1 & 2 will be ok.

1 Locating the faucet

Cut mouting holes to install the faucet. Remove the components (mounting nut and washers) which are attached to the bottom of the faucet. Install the faucet into the pre-drilled hole ensuring the washer is placed between the trim ring and the countertop surface.

Notes: Verify the dimensions against the actual faucet. If the faucet you bought has no soap dispenser or side sprayer, do not drill hole for it.

2 How to install the bottom components of the faucet

As shown above please fit the washers and mounting nut in turn, then secure the faucet to the bench by tightening the mounting nut clockwise.

If the faucet has a connector, screw to the spout shank (see wide spread kitchen faucet).

3 How to install the side sprayer and soap dispenser

Notes: If the product you bought has no spray or soap dispenser, skip it.

To install side sprayer, put holder into the hole, screw with nut. Put spray hose through holder, and fix it to the faucet. To install soap dispenser, put the head shank through hole, tighten the nut and bottle.

4 Connecting to the water supply

Connect hoses following the figure, which type is similar to the product you bought.

If the faucet you bought has sidesprayer, connect it as shown.

If the faucet you bought is pull down, Set heavy to the proper location, make sure the shower head can be pull down as you want.

After all connections are tightened up, turn on the faucet and flush through water in order to remove impurities and check for any leaks.
